

# SUBSTANCE ABUSE TREATMENT FACT SHEET

## Massachusetts Department of Public Health, Bureau of Substance Abuse Services

### February, 2002

*This fact sheet contains information about the impact of alcohol and other drug use in the Plymouth and Norfolk Senatorial District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2001.*

### Residents of Plymouth and Norfolk Senatorial District

#### **Treatment Admissions:**

In FY 2001, there were 120,687 admissions to licensed substance abuse treatment services in all of Massachusetts. Of these, 1.7% (2,040) reside in the Plymouth and Norfolk Senatorial District. Due to budget cuts in FY 2002, BSAS estimates that 19% (387) of Plymouth and Norfolk Senatorial District residents will not be able to access treatment services. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.**

- In FY 2001, 67.3% of admissions from the Plymouth and Norfolk Senatorial District were male and 32.7% were female.
- Over 62.3% of admissions were between the ages of 30-49.
- 93.7% of admissions were white non-Latino, 1.8% were black non-Latino, 2.1% were Latino, 0.3% were Asians, and 2.1% were other racial categories.
- 58.9% of those admitted to treatment were never married, 17.8% were married, and 14.5% reported not to be married now.
- 21.8% of admissions had less than high school education, 47.8% completed high school, and 30.3% had more than high school education.
- 37.8% of those admitted to treatment were employed.
- 9.6% of those admitted were homeless.
- 10.1% of admissions had prior mental health treatment.

#### **Substances Used in Past Year:**

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as 'polydrug' or 'polysubstance' use. For example, individuals who use cocaine, crack and heroin also may report the use of either alcohol and/or marijuana.

- Table 1 shows ALL substances which clients reported using in the year prior to admission, including the prevalence of injection drug use (IDU) in the Plymouth and Norfolk Senatorial District. Injection drug users (or IDU's) are individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

<b>Table 1</b> <b>Annual Admissions by Substance Used</b> <b>FY 1995 – FY 2001</b>							
<b>Plymouth and Norfolk Senatorial District</b>							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
<b>FY '95</b>	1,513	1,277	395	345	160	359	278
<b>FY '96</b>	1,291	1,061	352	304	144	307	234
<b>FY '97</b>	1,518	1,285	450	362	161	341	229
<b>FY '98</b>	2,042	1,723	560	464	205	476	381
<b>FY '99</b>	1,927	1,582	523	452	200	527	409
<b>FY '00</b>	1,988	1,570	533	473	237	536	415
<b>FY '01</b>	2,040	1,561	475	435	198	577	435

- Since peaking in FY 1998, residents of Plymouth and Norfolk Senatorial District reported a leveling off in alcohol use.
- Between FY 1995 and FY 2001, admissions reporting marijuana, cocaine, and crack use have increased by more than 20% and heroin increased by 61%.

### Heroin and Injection Drug Use:

Figure 1 below shows the proportional increases in all admissions in the Plymouth and Norfolk Senatorial District and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV<sup>1</sup>.

- Total treatment admission for all modalities rose 35% between FY 1995 and FY 2001. During the same period, admissions for heroin and injection drug use treatment increased 59%.

### Primary Substance of Use:

At admission clients also identify a “primary drug” of use which is the substance currently causing them the most problems.

- Table 2 compares the proportional distribution of primary drugs in Massachusetts with that for the Plymouth and Norfolk Senatorial District.

	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	58.8%	25.1%	5.3%	4.0%	2.4%
State	46.5%	35.9%	6.5%	3.9%	3.4%

- While cocaine as a primary drug of use in your Senatorial District was level with the State, alcohol as a primary drug was higher, and heroin, marijuana, and crack were lower within your District.
